INTRODUCTION part 1

for more see ecolanum.org/story

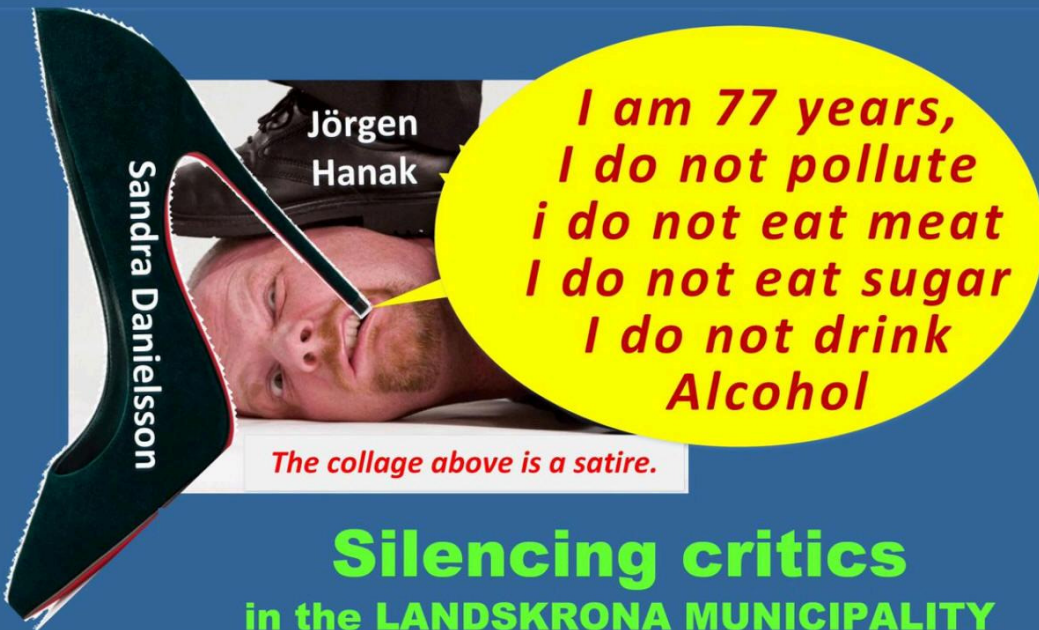

I am 77 years old, a former UN diplomat in the area of nuclear material control, aiming to prevent the proliferation of nuclear weapons and promote peace. In my work, I have been exposed to radiation, and my health has been affected.

I have received a 20-year award for excellent work in the promotion of peace. As a collective appreciation, I was awarded the Nobel Peace Prize in 2005.

What I experience and document is a déjà vu of Vilhelm Moberg's "The Emigrants" mercilessness towards the elderly, cruelty, oppression, brutality, bullying. It is a callous and sadistic approach to old, sick and helpless people.

INTRODUCTION part 2 for more see ecolanum.org/story

Upon the suggestion of Hans Blix, who was the Director General of the IAEA at that time, (I was in Barsebäck when he pointed to Ven as a good place to retire.)

We followed his advice and moved to Sweden. Hans Blix highly valued the Swedish administration and always presented it as a positive example in contrast to the countries where the IAEA was conducting inspections and other control measures.

After my retirement we purchased a farm in Sweden and got engaged in the [#ecological](#) landscape restoration following EUs [#Restoration](#) Regulation law trying to contribute to the overreaching objective of restoration of the 20% of degraded ecosystems.

Seeing the negligence of the environment protection, I have expressed my critical opinions about the state of [#environment](#) to the [#Landskrona](#) Environment Protection Authorities.

As result of my criticism, in order to silence me and restrict me in expressing my opinion, the authorities started to fabricate false evidence trying to accuse me for contamination despite of the obvious fact that I do not conduct any agricultural activities and the 100 goats were removed by the previous owner at the purchased time in 2017.

Following the ideals of reducing environmental impact, we live on 1500 SEK food expenses per month. We use resources of the "edible forest", I do not drink alcohol nor coffee, I do not eat meat, bread/pasta neither do I consume sugar or any sweets.

Miljöförvaltningen i Landskrona försöker tysta kritik genom att anklaga den nya ägaren, en 76-årig före detta FN-diplomat, för förorening av marken med ensilageplast som orsakades av den förra ägaren som bedrev getuppfödning. Detta är nonsens, maktmissbruk och trakasserier. Det är skandalöst att myndigheter behandlar medborgare på detta sätt i en demokratisk stat. Vi vet var gör man så.

Story of a former UN diplomat who moved to Sweden In 2017 and purchased a property which previously was used as a goat farm

The goat skull and the ensilage plastic are remains of the goat farming.

The new owner complains about the negligence of the authorities in Landskrona

The Landskrona authorities manipulate evidence and the legal system in Sweden in order to punish the critics. Déjà vu of my UN inspections in the totalitarian states.

INTRODUCTION

Story of a 76-year-old UN diplomat engaged in verification that States are honouring their international legal obligations to use nuclear material and technology only for peaceful purposes. (Awarded a Nobel Peace Prize.) During the inspections, several manipulations of the evidence were discovered, and the legal system was used to prosecute local staff who facilitated such verification. Oddly enough, the same processes of the misuse of the legal system by authorities take place in Sweden. Here, we will provide a popular version of the manipulation of the legal instances by The Swedish authorities in order to suppress freedom of speech and prevent critical publications.

CHAPTER 2, MORE WILL FOLLOW, ALL CHAPTERS ARE PUBLISHED ON WWW.ECOLANUM.ORG/STORY

A story of a former UN diplomat who moved to Sweden In 2017 and purchased a property which was previously used as a goat farm

The goat skull and the silage plastic are remains of the goat farming.

The new owner complains about the negligence of the authorities in Landskrona

As a punishment the Landskrona authorities try to silence the critic and manipulate evidence and the legal system in Sweden. Déjà vu of my UN inspections in the totalitarian states.

This case seems like a déjà vu of my work as a UN official. It began with an illegal allegation as punishment for telling the truth about the poor state of environmental protection in the municipality of Landskrona. As revenge, I was accused of contaminating my newly purchased property with silage plastic, in a miraculous manner without any agricultural activity (at the age of 76, with irradiated weak lungs!!!). It is a déjà vu of my work as an UN official in the totalitarian states, following a typical retribution scenario in such states what we will describe in the next chapters.

CHAPTER 3

CHAPTER 3 ecolanum.org/story

"so does the [#Freedom](#) of Speech Act protect the people's freedom of expression and opinion."

BUT THE [#LANDSKRONA](#) AUTHORITIES THREATENS

"if you do not stop [#criticizing](#) as we will tell that you conduct agriculture activities, [#fabricate](#) evidence and let the [#court](#) punish you"

Déjà vu in [#totalitarian](#) states, I am surprise to recognize the pattern in Sweden

imagine [#democracy](#) is threaten, will someone react

A story of a former UN diplomat who moved to Sweden In 2017 and purchased a property which was previously used as a goat farm

The citizen complains:
to Landskrona Municipality, "***you are responsible for neglection, the old owner, goat farmer has contaminated the area with silage plastic***"

The Landskrona responds,
"You critisize us, we will punish you and say that you are farming and you conaminate the area " Déjà vu of my UN inspections in the totalitarian states.

During the UN nuclear material controls according to international agreements, some local nuclear plant personnel told us the truth. This resulted in legal prosecution by the authorities of the inspected country.

The prosecution was organized by the country's legal system, based on fabricated evidence, manipulation, and the mutual loyalties of judges. It was a sad part of our work, as we, as diplomats, were safe, but we could see how the orchestrated prosecution frightened anyone who wanted to follow the rule of law. We asked for information (without a legal mandate) about our local counterparts but never received an answer, just as I am not receiving an answer in my case.

contradictory verdicts, then I
may appeal

Defendant Mr G.
No, No i did not appeal
therefore I can not recall "an
appeal" as I did not filed any

Defendant Mr G.
Stop, this is a manipulation of
the legal process based on
fabricated "facts" and
evidence. Please revise the
fraudulent decision.

The English version is on X (twitter) @eco_naut and additional Info in English
the entire case description see www.ecolanum.org/m

To silence critics the Landskrona Municipality fabricates a fictitious charge and they do it in violation of previous verdicts that convicted the previous owner of the property for contaminating the land with silage plastic. The new owner, a retired 76-year-old UN diplomat, has no goats, does no farming, but within the framework of his ecological activities in ECOLANUM points to shortcomings in the environmental protection and Landskrona Municipality believes that the criticism should be punished.

déjà vu in totalitarian states

This is how critics who dare to criticize environmental authorities in Landskrona are silenced.

ERROR JURIS Logical and legal nonsense

1. Has the convicted B received amnesty? even though B. is still guilty
2. Are there two guilty parties?
3. Why does B. not pay the fees that were assessed?

2023

The Environment Protection issues a new injunction dnr 39599-2023 which attempts to bind the new owner to the silage plastic contamination, despite the fact that all agricultural activities were terminated at the time of purchase. The motto reads: "We will silence critics by constructing false accusations, like in the GDR or Soviet".

ERROR JURIS

The new injunction undermines the existing verdicts what violates the legal and democratic order. It is impossible to relate to this completely illegal decision.

The old, convicted owner B. does not clean the silage plastic

**All VERDICTs say:
B. must remove the plastic**

During 2018-2022

(I). Landskrona's Environment protection
(II) the County Skåne legal unit
(III) the Land and Environment Court and
(IV) the Land and Environment Supreme Court find only the former owner B. being guilty of pollution

2018-2022

During the period 2018-2022, various legal bodies establish a causal relationship between goat farming conducted by Mr. B and the silage contamination. The courts find that B is solely to blame for the contamination of the land with the silage plastic and order that B must remove the plastic.

the new owner lived abroad until 2017, when he bought the property

**From 2000 to April 2017, B. ran a goat farm and contaminated the land with silage plastic.
In 2017 the new owner moved to Sweden
and purchased the property**

More info for citizens and journalists - www.ecolanum.org/w

From 2000 to April 2017, B. ran a goat farm and contaminated the land with silage plastic, the plastic was mixed into the manure and straw. In April 2017 G. Former UN diplomat, age 76, purchased the property implementing the EU's ecological restoration by rewilding.

Due to chaotic legal situation, G. requested supervisory administrative courts to review the situation for compliance with the legal principles.

2018 - 2022

Land and Environment court (Mark och Miljödomstolen -Växjö)

Skåne County legal unit (Länsstyrelsen Skåne rättsenheten)

Landskrona Municipality Environment protection (Landskronas Miljöförvaltning)

New Induction dnr 39599-2023 (nytt föreläggande)

This is a violation of the valid court verdicts

Mr G is guilty of silage contamination

OPINION

OPINION

2024-05-13

2024-04-23
SECTION 2

2024-04-21
SECTION 6

G. requested several times (NO ANSWER) to defer the appeal dead-line until supervisory administrative courts assess legality of the process.

ERROR JURIS The opinion/injunction undermines the existing verdicts, what violates legal order. It is impossible to relate to this completely illegal decision. A total causal and legal chaos prevails.

ERROR JURIS the inductions (förelägganden) contradict each other, the old one is not invalidated, and there is no request for the new trial (resning)

The english version is on X (twitter) @eco_naut and additional Info in English the entire case description see www.ecolanum.org/w

Man gör det genom att fabricera en fiktiv anklagelse och man gör det i strid med tidigare domar som dömde föregående ägaren av fastigheten för förorening av marken med ensilageplast. Den nya ägaren, en pensionerad 76-årig FN-diplomat, har inga getter, bedriver ingen jordbruksverksamhet, men inom ramen för sina ekologiska aktiviteter i ECOLANUM pekar på brister i miljöskyddet och Landskrona Kommun anser att detta ska bestraffas.

déjà vu så tystas kritiker som vågar kritisera miljömyndigheter i Landskrona

Error Juris,
Juridska nonsens
1. Har den dömde B fått amttnesi?
Trots att B. är fortfarande skyldig
2. Finns det två skyldiga?
3. Varför betalar B. inte avgifterna som dömdes?

Den gamla, dömda ägaren B. rensar inte ensilage plasten

Under 2028-2022 Landskronas förläggande, Länsstyrelsen, Mark- och Miljödomstolen samt Mark- och Miljööverdomstolen finner endast den tidigare ägaren B. skyldig till förorening

Från 2000 till april 2017 bedrev B. en getfarm och förorenade marken med ensilageplast.

2023:

Miljöförvaltningen utfärdar ett nytt föreläggande dnr 39599-2023 som försöker binda den nya ägaren till föroreningen av ensilageplast, trots att alla jordbruksaktiviteter avslutades vid köptillfället. Mottot lyder: "Vi ska tysta kritiker genom att konstruera falska anklagelser, likt i DDR eller Soviet".

DOM:

B. ska ta bort plasten

2018-2022

Under perioden 2018-2022 fastställer olika rättsliga instanser ett orsakssamband mellan getuppfödning som bedrivits av Mr. B och ensilageföroreningen. Domstolarna finner att B är den enda skyldige för föroreningen av marken med ensilageplasten och beordrar att B måste ta bort plasten.

ERROR JURIS
Föreläggandet underminerar de gällande domarna, vilket strider mot den juridiska ordningen. Det är omöjligt att förhålla sig till detta fullständigt illegala beslut.

LEGAL CORRESPONDENCE AND TECHNICAL ANALYSIS

All of the mentioned circumstances constitute a miscarriage of justice and a corrupt misuse of administrative procedures, which I have witnessed in other countries during my work as a UN diplomat in the field of nuclear safety particularly inspection of nuclear materials

date:	2024-08-12 <i>NOTE: the text of this document in the readable format is on www.ecolanum.org/adm_plast_jus_jo what can be used for the internet translation</i>
TO:	Justitieombudsmannen (JO), dnr. 4137-2024 Riksdagens ombudsmän,
FROM:	Richard Gronvius, Age 76, former UN diplomat/international Atomic Energy Agency, Nuclear Safety, 20 years of excellent work performance at IAEA award, co-worker to Hans Blix, Peace Nobel Prize in 2005 as employee of IAEA,
Subject:	Application for the correction/annulation of the decisions and processes related to the abuse of the legal system (several error juris and error facti) initiated by the Environment Protection (miljförvaltningen) in Landskrona, in 2023 and described in the document. As the essential information requested by the defendant (see the content of this document) was not delivered (no answer was provided) by the Mark och Miljödomstolen and Mark and Miljööverdomstolen I apply to defer any decisions until i get the response (komplettering behövs) and will be able to complete the complaint to Justitieombudsmannen (JO), dnr. 4137-2024

I am applying that the following decisions and processes have to be evaluated and made "void" on the ground of the error of law (error juris) and the error of facts (error facti). The initial injunction (föreläggande) on the grounds of listed errors should be annulled (put "de null")

Landskrona Municipality, Environment protection unit. (Miljöförvaltningen)	dnr. 39599-2023.
Skåne County, Legal Unit (Länsstyrelsen)	dnr. 3168-2024
Land and Environment, Växjö (Mark och Miljödomstolen)	målnr. M 2134-24
Land and Environment, superior court (Mark och Miljööverdomstolen)	målnr. ÖM 5644-24
Justitieombudsmannen (JO), Riksdagens ombudsmän	dnr. 4137-2024

Introduction

I am a 76-year-old former UN diplomat and nuclear safety adviser, and I am also a laureate of the collective Nobel Peace Prize. I was awarded by the UN/IAEA for 20 years of excellent performance in promoting peace.

My case seems like a déjà vu of my work as a UN official. It began with an illegal allegation as punishment for telling the TRUTH about the poor state of environmental protection in the municipality of Landskrona. As revenge, I was accused of contaminating my newly purchased property with ensilage plastic (error juris and error facti) in a miraculous manner without any agricultural activity (at the age of 76, with irradiated lungs!!!). It is a déjà vu of my work as a UN official, following a typical retribution scenario described below.

During nuclear material inspections according to international agreements, some local nuclear plant personnel told us the TRUTH. This resulted in legal prosecution by the authorities of the inspected country. The prosecution was organized by the country's legal system, based on fabricated evidence, manipulation, and mutual loyalties among judges - déjà vu. It was a sad part of our work, as we diplomats were safe, but we could see how orchestrated prosecutions frightened anyone who wanted to uphold the rule of law. We inquired about information (without a

legal mandate) regarding our local counterparts but never received a response, just as I am not receiving answers in my case.

Summary

The case relates to an attempts to shift responsibility for the silage plastic contamination to the new owner Richard Gronvius, retired UN diplomat, age 76 who purchased the property and moved to Sweden in 2017. The previous owner, Mr. Glenn Björne, who has been declared guilty by several still valid sentences (in the span of 2018 - 2022) issued by several courts, lacks funds.

This case represents a manipulation of the legal system, consisting of error juris and error facti, aimed at silencing a critic of the mismanagement of environmental protection by the Landskrona authorities, utilizing means to restrict freedom of speech and intimidation.

Furthermore, the fabrication of facts and arbitrary decisions are made without any response to questions posed by the defendant constitute a breach of the Rule of Law and citizens' rights.

Several discriminatory and intimidating actions against the new owner have been initiated without legal reasons, excluding the previous owner, who is legally responsible based on the previously established causality and factual evidence.

Basic facts and documents, chronological sequence

Original in English, legally valid
(if necessary the Swedish translation can be provided)

back-ground fact on the property	on the property TUNA 32:3 a goat farming was conducted since around year 2000. Several complains about hygienic standards and contamination of the ground were delivered to the Landskrona Protection Environment.
change of ownership April 2027	In 2017 we have purchased a property on the island of Ven. Until 2017 Mr. Glenn Björne, conducted the goat farmer on the plot. The activities were discontinued when Richard Gronvius (defendant) purchased the house and the mark. The new owner, retired UN diplomat in area of Nuclear Safety, age 76 is engaged in ecological restoration/rewilding within the framework EU programme with a brand name Ecolanum.
stipulated purchase conditions	The stipulation oblige Björne to clear all the waste material, including plastics
Real Estate agent, the neighbor and Municipality of Landskrona certify that the property is cleaned of all waste material.	According to the of the Real Estate agent, the neighbor and Municipality of Landskrona the previous owner cleaned the property from plastics but in reality left invisible silage plastic mixed with manure. Mr. Glenn Björne during 15 years did not dispose the wrap silage plastic but left at the place the goats were fed and the plastic got covered with the manure and straw bedding.
	Mr. Glenn Björne was sentenced at the several instances, starting in 2018 for not removing the silage plastic and was fined for not conforming to the verdicts. In 2022 and 2023 it has shown that Mr. Björne is not fulfilling his obligations due to the lack of funds.
Municipality of Landskrona case dnr. 39599-2023.	The Environment protection unit of the Municipality of Landskrona changed previous, legally valid injunction (föreläggande) without changing causes of the plastic contamination against all legal rules of the legal justice.
DOCUMENT 2024-02-05	<p>The attempt to make the Environment Protection unit of Landskrona aware about serious violation of the legal practice of the democratic states.</p> <div> <p>ATTACHMENT: "undermining_legal_order_in_sweden_landskrona_dnr_39599-2023_date_2024-02-05.pdf"</p>  </div>

<p>appeal to the County of Skåne dnr.</p>	<p>The Municipality of Landskrona committed several serious errors which were not corrected by the County of Skåne.</p> <p>Error of Law ("error juris") and Error of Facts. ("error facti")</p> <p>Violation of the legal principles by The Municipality of Landskrona and the legal unit of the County of Skåne.</p>
	<p>The Errors of law</p>
	<p>By introducing a new culpable i.e. the new owner, who was not even living in Sweden at the contamination period and disregarding causality and manipulating facts</p> <p>the Environment Protection of Landskrona is undermining the valid verdict of the several courts sentencing Mr. Glenn Björne. The new owner, who was never accused of any contamination is now assumed being guilty of contamination.</p> <p>(in Anglo-Saxon legal terminology it is contempt for court to questioning previous verdicts of courts)</p>
	<p>The error of law constitutes of placing the responsibility for the payment of the inspection fee on the new owner. This is a clear act of discrimination and error of judgment as the old owner Mr. Glen Björne is still guilty by lawful sentences. Mr. Glenn Björne is not exonerated from the guilt of contamination. It is not legally correct (an error) to a priori assume that Mr. Glenn Björne lacks funds and therefore is not bound by of financial consequences.</p> <p>It is like asking an obedient passenger to pay fine for another passenger who travels without a ticket.</p>
	<p>Error of facts</p>
<p>Landskrona Municipality fabricates lies accusing the new owner for conducting agricultural activities</p>	<p>The County Skåne judgment is based on the fake fact that the new owner is conducting the agricultural activities, what is a fabrication</p> <p>First by assuming that the defendant, the 76 years former UN diplomat in the field of Nuclear Safety without any staff is performing agricultural activities – nonsense.)</p> <p>ATTACHMENT</p> <p>"new_owner_no_agricultural_activity.pdf"</p> <p>NO ANSWER</p>
<p>Silencing a critic of the</p>	<p>In reality the ground is left for rewilding and ecological restoration what has irritated the Environment protection authorities of Landskrona who</p>

Landskrona environment protection authorities	during almost 20 years neglected the contamination performed by the previous owner Mr. Glenn Björne, a goat farmer.
	<p>The second point is an insinuation that the new owner could have seen the plastic mixed in the manure. Is really the Environment protection thinking that a nuclear expert could have an expertise and suspicious that someone can hide plastic in manure? again nonsense which all previous court did not even considered. (also error of law, questioning verdict of a court) The new fantasifull assessment of Environment protection unit of Landskrona goes against the its own statement of 2017.</p> <p>The Environment Protection unit statement that the plastic was removed. It was confirmed by the real estate agent and by the neighbor photo that shows plastics moved to the location still owned Mr. Glenn Björne .</p> <p>all mentioned documents.</p>
County Skåne confirms the decision of the Landskrona Municipality.	Basically the legal unit of the County Skåne confirmed the assessment of the Environment Protection of the Municipality of Landskrona introducing a few formal mistakes as the manipulation of the fact base, omitting the fact of long standing problems between the old owner and the Environment protection Mr. Glenn Björne
	<p>Överklagan of disastrous injunction (föreläggande) dnr_39599-2023 issued by the Landskrona Municipality to the legal unit of the county of Skåne.</p> <p>ATTACHMENT</p> <p>överklagan_dnr_39599-2023_to_länsstyrelsen.pdf</p>

violation of citizens rights, violation of rule of law, contempt for a citizen, no answers, no communication,

From 2000 to April 2017, Mr. B. ran a goat farm and contaminated the land with silage plastic, the plastic was mixed into the manure and straw.

In April 2017 Mr. G. Former UN diplomat, Nuclear safety, age 76, purchased the property, moved to Sweden and is implementing the EU's ecological restoration directive by rewilding.

Valid sentences (2018 . 2022) by the courts; only Mr. B is guilty of contamination

New opinion (2023) of Municipality; Mr. G is also guilty of contamination

court
Please complete the appeal you filed

court
NO ANSWER 

court
So you are recalling you appeal?

court
OK, so now you have recalled your appeal, hence the "opinion" of municipality is valid

court
NO ANSWER 

Defendant Mr G.
Wrong, I did not appeal, Let administrative courts decide if it possible to have two valid contradictory verdicts, then I may appeal

Defendant Mr G.
No, No i did not appeal therefore I can not recall "an appeal" as I did not filed any

Defendant Mr G.
Stop, this is a manipulation of the legal process based on fabricated "facts" and evidence. Please revise the fraudulent decision.
